

UX/UI Design

Design products people love to use.

Learn how modern product teams solve problems through research, systems thinking, interface design, and prototyping while incorporating emerging AI-enabled workflows where they add value.

What you'll master

- User research & audience insights
- Information architecture & user flows
- Interface design & component systems
- Prototyping & usability testing
- Design systems & modern product workflows

You'll walk away with:

Two portfolio-ready product case studies and a complete design sprint project.
